

Find the equation of the line through (2, 6) which is perpendicular to $y = 2x + 3$.

Find the equation of the line through (2, 6) which is perpendicular to $y = 2x + 3$.

Find the equation of the line through (2, 6) which is perpendicular to $y = 2x + 3$.

Find the equation of the line through (2, 6) which is perpendicular to $y = 2x + 3$.

Find the equation of the line through (2, 6) which is perpendicular to $y = 2x + 3$.

Find the equation of the line through (2, 6) which is perpendicular to $y = 2x + 3$.

Calculate the perpendicular bisector between $(0, 2)$ and $(6, 0)$.

Calculate the perpendicular bisector between $(0, 2)$ and $(6, 0)$.

Calculate the perpendicular bisector between $(0, 2)$ and $(6, 0)$.

Calculate the perpendicular bisector between $(0, 2)$ and $(6, 0)$.

Calculate the perpendicular bisector between $(0, 2)$ and $(6, 0)$.

Calculate the perpendicular bisector between $(0, 2)$ and $(6, 0)$.
